Allowable Subject Matter

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance: claims are allowable at least for the reason that an optical path length of a light beam having a short wavelength is different from an optical path length of a light beam having a long wavelength in an optical path length from a reflective surface of the polygonal rotating mirror to the exposed surface of the exposed object as set forth in the claimed combination.

Kawabata et al (US 2004/0004748A1) discloses a light scanning unit comprising a composite light source (Fig. 1, 1), an optical system comprising a collimator lens (2), cylinder lens (3), a polygonal rotating mirror (5), an optical element (4) and F- θ lens (6), but lacks an optical path length of a light beam having a short wavelength that is different from an optical path length of a light beam having a long wavelength in an optical path length from a reflective surface of the polygonal rotating mirror to the exposed surface of the exposed object as set forth in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
